Professional Summary

Software Engineer with hands-on experience developing and maintaining internal business applications, ERP, POS and content management systems. Experienced with React, TypeScript, Angular, Laravel, C#, .NET, Entity Framework Core, REST APIs and relational databases, with additional backend development experience using Node.js and Express. Skilled in feature development, software maintenance, system integration and application modernization using Domain-Driven Design (DDD), Clean Architecture and collaborative software development practices.

Experience

ALAS

Remote

Software Developer – Project-Based

Feb. 2025 – Present

- Develop and maintain internal administrative and content management systems using C#, .NET and Entity Framework Core.
- Implement new modules, sections and functionality within existing internal platforms based on evolving operational requirements.
- Work with relational data through Entity Framework Core and ORM-based data access, integrating application functionality with existing database structures.
- Maintain and extend existing application functionality while preserving established workflows and application architecture.
- Contribute to troubleshooting, feature updates and iterative modernization of internal business applications.

Softseti

Monterrey, Nuevo León, Mexico (Remote)

Software Engineering Intern

Jul. 2025 – May. 2026

- Developed and maintained ERP, POS and Back Office applications used across multiple companies and operational environments.
- Built web interfaces using React, TypeScript and Angular, and contributed to Laravel backend development under a Domain-Driven Design (DDD) architecture.
- Designed and implemented functionality for Products, Purchases, Additional Fields, Adjustments and Subscription modules.
- Developed the frontend implementation of a configurable Business Rules Engine and integrated purchase calculation functionality into an internal calculation library.
- Implemented POS functionality for product stock consultation, customer and seller management, checkout workflows and cash closing processes.
- Integrated REST APIs, legacy systems and multi-tenant configuration features supporting multiple companies and environments.
- Integrated Grafana monitoring and contributed to debugging, maintenance and production support across ERP, POS and Back Office systems.
- Collaborated with technical and operational teams using Git, Git Flow, Jira and Confluence throughout the software development lifecycle.

Universidad Veracruzana – Instituto de Investigaciones Biológicas

Xalapa, Veracruz, Mexico

Software Quality Assurance and Deployment – Social Service

Feb. 2025 – Aug. 2025

- Executed automated and end-to-end test cases using Selenium and .NET for a marine mammal stranding management platform.
- Performed functional and integration testing across web and mobile versions, identifying and documenting software defects and validating application workflows.
- Participated in database and application deployment processes using Plesk environments.
- Assisted in deploying the platform within the infrastructure of the Instituto de Investigaciones Biológicas (IIB) at Universidad Veracruzana.

Education

Universidad Veracruzana

Xalapa, Veracruz, Mexico

Bachelor's Degree in Software Engineering

2019 – 2026

Skills

Frontend Development: React, TypeScript, Angular, JavaScript, HTML5, CSS3

Backend Development: C#, .NET, Entity Framework Core, Node.js, Express.js, Laravel, PHP, REST APIs

Database Management: SQL, MySQL, Relational Databases, ORM

Software Architecture: Domain-Driven Design (DDD), Clean Architecture, Repository Pattern, MVC

Testing & Quality Assurance: Selenium, Automated Testing, Functional Testing, Integration Testing, End-to-End Testing

Monitoring & Observability: Grafana, Metrics Visualization, System Monitoring

Development Tools: Git, GitHub, Jira, Confluence, Postman, Plesk, AWS

Enterprise Systems: ERP Systems, POS Systems, Content Management Systems, Business Applications, Legacy System Integration

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability

Languages

Spanish: Native

English: B1
